Your Local Masjid

Stay spiritually connected with your nearby Masjid by receiving the authentic live Azaan directly from your community.

Cultural and Emotional Context

There was a time when, upon hearing the Azaan, people paused their activities—conversations were hushed, music was stopped, and heads bowed in silent reverence. It commanded not just attention but also respect. Children grew up associating the voice of the mu'azzin with discipline, serenity, and divine rhythm. Today, without the Azaan being audibly broadcast in many neighborhoods, that shared communal moment is lost. Families often find themselves missing prayer times unintentionally, and the spiritual atmosphere that once defined Muslim homes has subtly faded. This shift is not just a matter of habit or nostalgia—it speaks to a broader concern: the fading presence of sacred sounds that once spiritually nourished communities daily.

In recent years, several Indian states have imposed restrictions or bans on the use of loudspeakers for delivering the Islamic call to prayer (Azaan). Experiencing noise pollution and public nuisance concerns. While these regulations are rooted in maintaining public order, they have inadvertently contributed to a significant spiritual and emotional void within many Muslim households. The Azaan is not just a call to prayer; it is a sacred and rhythmic reminder of divine presence that historically.

Anchored daily life in Muslim communities. For generations, the Azaan, broadcasted from local masjids, served as a unifying spiritual signal encouraging mindfulness, reflection, and submission to Allah at prescribed intervals. With the restrictions on loudspeakers, countless Islamic households now miss this vital reminder, leading to a deep sense of disconnection from the masjid and a perceived decline in the barakah (blessings) within their homes.

Alongside the Azaan, regular bayans (Islamic sermons), especially early morning reflections and Friday sermons, were often audible from the masjid, enriching the daily lives of Muslims with religious guidance and spiritual nourishment. Today, with loudspeakers silenced, many Islamic households feel a growing sense of spiritual emptiness. The Azaan and bayans that once brought barakah (blessings), tranquility, and a sense of connectedness to the masjid are now missed deeply. Children no longer grow up hearing the call to prayer; adults lose track of prayer timings amidst daily distractions; and elders, once comforted by the familiar voice of their local mu'azzin or scholar, now experience a silent void.

Why This Matters?

Disconnection from Masjid Life: The absence of the Azaan removes a core element that linked households to their neighborhood mosques, especially for the elderly, women, and children who may not frequently attend congregational prayers.

Loss of Communal Barakah: Many Muslims believe that the sound of the Azaan brings blessings into the home, purifies the environment, and instills tranquility. Its absence, therefore, is felt not just as a silence—but as a spiritual loss.

Missed Religious Observances: Without audible Azaan, especially in less tech-savvy or elderly populations, the likelihood of missing prayer times increases, weakening religious discipline.

Decline in Respect and Reverence: Without audible Azaan, especially in less tech-savvy or elderly populations, the likelihood of missing prayer times increases, weakening religious discipline.

Solution Overview

Tahfa Box is an innovative IoT-based solution designed to strengthen the spiritual connection between Muslims and their local masjids (mosques). Recognizing modern challenges such as loudspeaker restrictions and physical distance, this initiative enables worshippers to stay engaged with masjid activities in real-time from the comfort of their homes. By "My Adhaan Box " leveraging wireless technology and a dedicated mobile application, offers a seamless, efficient, and user-friendly platform for live audio streaming of Azan, Majlis, and Dawah sessions.

Tahfa Box represents a thoughtful fusion of technology and tradition. By making masjid activities accessible in real-time to homes, it not only fosters deeper religious engagement but also addresses practical concerns in a respectful and modern way. It is an empowering tool for communities looking to stay spiritually connected, especially for the elderly, home-bound individuals, and those living in areas with restrictions on public sound broadcasting.

Solution Overview

Masjid Master Device :

The first device is installed at the masjid. This can be either a dedicated hardware unit or a tablet connected directly to the mosque's audio amplifier. It captures the live audio from the masjid and securely transmits the broadcast to the cloud.

Tahfa Box :

The second device, My Adhaan Box, is purchased by individual users and can be placed in homes, offices, shops, or any preferred location. It receives the live audio stream from the selected masjid, allowing users to experience the Adhaan, Bayan, and Khutbah in real time. Users only need to complete the setup once using the My Adhaan App, available on the Google Play Store and Apple App Store. During the initial setup, users simply: * Connect the My Adhaan Box to their local Wi-Fi network. * Select their preferred masjid from the available list. Once the setup is complete, the mobile phone is no longer required for daily operation. The My Adhaan Box automatically connects to the configured Wi-Fi network and seamlessly streams live Adhaan, Bayan, and Khutbah from the selected masjid whenever a broadcast begins.

Who We Are

Tahfa Box is proudly designed, developed, and manufactured in India by Fifty One Code Solutions Pvt. Ltd., a technology company based in Mangalore. Every device is built with a focus on reliability, ease of use, and long-term performance, helping bring the Adhaan from your preferred masjid directly into homes, offices, and personal spaces.

Our Commitment :

We believe technology should make it easier to stay connected with your faith. Every My Adhaan Box is carefully developed to deliver a dependable listening experience while maintaining the authenticity of live Adhaan, bayan etc from the desired masjid's.
